Wall of Fortune

Maker Faire is about **celebrating learning** and **doing** – not just the finished and perfect end product, but the whole process of making. It's a place to show projects, and share what we're learning with others. It's a cultural event that celebrates our ability to **create, build, invent, tinker** and **make** things that are wonderful. At Maker Faire, we get to experience maker culture – its joy, enthusiasm, generosity, and optimism. It connects each of us to the world around and to makers all around the world. Participation in maker culture offers the deeper satisfaction of **curiosity, exploration** and **problem-solving**. It rewards us for developing our talents and being resourceful and resilient. Come be part of a maker community that is open and inclusive of all kinds of people of all ages and abilities.

The **CITY of ROCKLIN** is
extremely proud to host this event for you!

THANK YOU
